### Summary of our Industry

India’s high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress. Infrastructure is a key enabler in helping India become a US\$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors. The government’s focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway. Infrastructure support to nation’s manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India’s population. India has the world’s largest cattle herd (buffaloes), largest area planted to wheat, rice,

and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. Agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

- 2. We derive a significant portion of our revenue from our Agro business. Therefore, factors that adversely affect the demand for such Agro business or our position and reputation may adversely affect our business and results of operations.**

We derive a significant portion of our revenue from our Agro business and are dependent on the cash flow generated from our Agro business for the growth. Our Agro business accounted for 100 %, 100 % and 62.81 % of our total revenue from operations for fiscal 2023, fiscal 2022 and fiscal 2021, respectively.

Further, our Infrastructure business have derived nearly 0 %, 0 % and 37.19 % of our total revenue from operations for fiscal 2023, fiscal 2022 and fiscal 2021, respectively. Consequently, factors that adversely affect the demand for Agro business or our position or reputation may adversely affect our business and profitability. The loss of a major customer could lead to a significant decrease in revenue, harm our reputation and reduce our ability to accurately predict cash flow. The risk of such a loss is increased by the fact that the Agro business is an extremely competitive segment in the agriculture industry in India. All of these factors could have an adverse effect on our business, financial condition and results of operations.

- 3. Majority of our state wise revenues from Agro operations for the last 3 financial years i.e.; March 2023, 2022 and 2021 is dependent majorly on Telangana and Andhra Pradesh. Any loss of business from may adversely affect our revenues and profitability.**

Currently, we are carrying our Agro business mainly in the southern region of India, especially in Telangana and Andhra Pradesh and hence our major revenues are generated from operations in these regions only. Our sales are majority derived from Agro business in Telangana and Andhra Pradesh. For details on “our property” and “our Geography wise revenue breakup”, please refer to page nos. 108 and 105 of this Draft Prospectus, respectively. In the event of political discord, economic instability or change in policies of state, natural calamities, riots in the

region where our operations are significantly carried as a result our business activities will be affected or gets stopped or if there are any changes in laws applicable to our industry or if any restrictive conditions are imposed on us or our business. then our financial conditions and operating results may be materially and adversely affected. Further, the ultimate customers located in this geography may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues. Further, any failure in expanding our geographical presence within India will lead to loss of opportunity to expand thereby effecting our intended growth in business, financial conditions, and results of operations.

- 4. Since company is engaged in business of agricultural pulses, especially Toor Daal, Urad Daal, Moong Daal, Corn / Maize and Paddy, our company is dependent on continued supply of agro produce and fluctuations in agro pricing including the taxes and levies, could have adverse impact on our Company's business, financial condition and profitability.***

Our major products in our Agro business include *Toor Daal, Urad Daal, Moong Daal, Corn / Maize and Paddy*. The timely availability, cost and quality of any of these products being supplied to us plays an important role in building strong foundation for our business operations and client retention and/ or acquisitions. If any disruption is there in either of the factors mentioned above which are not under our control, including general economic conditions, competition, production levels, transportation costs, government taxes and levies, and if, for any reason, our regular/primary suppliers refuse or delay or discontinue the delivery of all or certain products to us in the quantities we need and at prices that are competitive, our ability to meet our order requirements shall come to a temporary standstill and our delivery schedules could be disrupted, and we may not be able to complete and execute our projects as per schedule or at estimated costs. Further, we may also not be able to pass on any increase in the prices of these products to our customers which could affect our results of operations and impact our financial condition.

Further, we currently do not have any long term tie-ups or agreements for supply of any of products and this may expose us to the changes in the prices of agro products. The increase in prices of the products increases our expenditure hence our profitability if we are not able to pass the expenses on to our customers. Any decrease in the availability of these products for whatever reason, could adversely affect our execution capacity and profitability.

- 5. The production and supply of certain agricultural produce and commodities are subject to seasonal factors. Our inability to accurately forecast demand for the agro commodities that we trade, may have an adverse effect on our business, results of operations, cash flows and financial condition.***

The business of Viz., Toor Daal, Urad Daal, Moong Daal, Corn / Maize and Paddy in the agricultural produce and commodities are subject to seasonal factors. Toor Daal, Urad Daal, Moong Daal, Corn / Maize and Paddy are the major commodities, in which our company deals and are exposed to seasonal risk. This is due to the fact that majority of the farmers depend on rain for cultivation. Generally, rainfall occurs during Kharif season and hence, the timing and seasonality of rainfall impacts the export operations of our Company. Thus, we are subject to seasonal factors, which make our operating results relatively unpredictable. Due to dependency on seasonality of agro crops, results of one reporting period (quarter/half year/year) may not be necessarily comparable with preceding or succeeding reporting periods. We are impacted by seasonal variations in sales volumes, which may cause our revenues to vary significantly between different quarters in a Fiscal.

Further, each of the agricultural produce and commodities has a specific shelf life and if not sold prior to expiry, it may lead to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations, future cash flows and financial condition.

- 6. We are dependent on third party transportation service providers for delivery of agricultural produce and other raw material to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.***

We are significantly dependent on third party transportation providers for the delivery of agricultural produce or commodities to us and delivery of the same to our customers situated in Telangana and Andhra Pradesh only. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, agricultural produce or commodities may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to procure or transport the agricultural produce and commodities or to deliver the same to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition. However, there has been no such instances in the last three financial years, which had an adverse impact on the business and the financials position of our Company.

Further, we have not entered into any long-term agreements with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the agricultural produce or commodities suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

Further, We are engaged in the field of subcontract arrangements with the main contractor for Infrastructure Development; our success depends on the smooth supply and transportation of the raw materials required to reach at site which are subject to various uncertainties and risks. In addition, raw materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of raw materials in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

**7. *We have working capital requirements. If we experience insufficient cash flows to make required payments on our debt or fund working capital requirements, there may be an adverse effect on our results of operations.***

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our Trade Receivables for the period ended March 31, 2023, March 31, 2022 and March 31, 2021 were Rs. 4652.99 Lakhs, Rs. 2893.74 Lakhs and Rs. 2604.34 Lakhs respectively and our inventories for the period ended March 31, 2023, March 31, 2022 and March 31, 2021 were Rs. 458.20 Lakhs, Rs. 445.84 Lakhs and Rs. 249.47 Lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "*Objects of the Offer*" on page 63 of the Draft Prospectus.

**8. *Substantial portion of our revenues has been dependent upon limited number of customers.***

Revenue from our top 10 customers in agro business constituted 79.10 %, 80.89 % and 78.18 % of our revenue from operations for financial year ending March 31, 2023, March 31, 2022 and March 31, 2021 respectively. We do not have firm commitment supply agreements with most of our customers and other terms of our services and

solutions. The loss of any significant client would have a material effect on our financial results. We cannot assure you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

In the event of a delay, inadequacy or default in deliveries by any of our vendors, we may not be able to source our hoardings on an adequate and timely basis or on commercially acceptable terms. A major disruption to the timely and adequate supplies of our outdoor hoardings could adversely affect our business, results of operations and financial condition. Any problems faced by our suppliers in their manufacturing facilities resulting in delays or non-adherence to quality requirements could adversely impact our ability to meet our customers' requirements in time and our operations would be affected to the extent we are unable to line up supplies from alternate suppliers.

**10. *Some or all of our Ongoing Projects may be delayed or may not be completed by their expected completion dates or at all. Such delays may adversely affect our reputation, business, results of operations and financial condition.***

Our Ongoing Projects may be subject to significant changes and modifications from our currently estimated management plans and timelines as a result of factors outside our control, including, among others:

- failure or delay in securing necessary statutory or regulatory approvals and permits for us to develop our projects;
- inability to complete our projects in agreed time;
- availability of financing;
- occurrence of force majeure events including natural disasters and weather conditions;
- legal proceedings initiated against us, landowners or development partners by individuals or regulatory authorities seeking to restrain development of our projects;
- defects or challenges to land titles;
- reliance on third-party contractors and the ability of third parties to complete their services on schedule and in budget; and
- regulatory changes such as changes in development regulations and challenges in interpreting and complying with them.

Such changes and modifications to our timelines may have a significant impact on our Ongoing Projects, and consequently, we may not develop these projects as contemplated, or at all, which may have an adverse effect on our reputation, business, results of operations and financial condition.

These projects are at Dharmaram Village, Keesara Mandal, Medchal-Malkajgiri District., just 26 kms away from Secunderabad Railway Station. Under the terms of these agreements, we are required to contribute a certain amount as initial capital contribution to the contract agreement and we are entitled up to approximate 80-90 percentage of the profits that is generated by the contract agreement. Additionally, we are required to assist the contract agreement in obtaining financing for the construction and development of the project and may also be responsible for additional capital contributions, as and when the need arises. Further, we are required to obtain the consent of our contractors before transferring our ownership interests, transfer or purchase of assets above certain thresholds and making material changes to the businesses. In addition, pursuant to our contract agreements, we are required to indemnify our contractors for any

losses that may arise as a result of our acts in breach of the agreement. If we are required to bear losses under these contract agreements, our financial condition and results of operations may be adversely affected.

***12. The business and future results of operations of our Company may be adversely affected if we incur any time or cost overruns.***

Our Company's business plans are subject to various risks including time and cost overruns and delays in obtaining regulatory approvals. Further, there could also be unexpected delays and cost overrun in relation to our projected / future projects and thus, no assurance can be given to complete them on scheduled time and within the expected budget. If such changes take place during the course of development of any of our projects, then our projections regarding the costs, revenues, return on the project, profitability as well as our operations will be adversely affected.

Further, if there are any revisions made to the existing plans, approvals, permits or licenses granted for our Ongoing Projects by relevant authorities, then we may, as a result of such revisions, be required to seek approval from the existing customers, if and to the extent required by law, of such project, undertake unplanned rework, including demolition on such projects or re-apply for and obtain key regulatory approvals. Such an occurrence may result in time and cost overruns, including customer complaints and claims under the evolving regulatory framework, which may have an adverse effect on our reputation, business, results of operations and financial condition.

***13. Our business and growth plan could be adversely affected by the incidence and rate of taxes and stamp duties, which could adversely affect our financial condition and results of operations.***

As a property owning and development company, we are subject to the property tax regime in each state where our projects are located. These taxes could increase in the future, and new types of property taxes may be introduced which would increase our overall development costs and other costs. We are also subject to stamp duty for the agreements entered into in respect of the properties we buy and sell. If these duties increase, the cost of acquiring properties will rise, and sale values could also be affected, resulting in reduction of our profitability. An increase in stamp duties could also adversely affect investor demand and may adversely affect our sales. Any such changes in the incidence or rates of property taxes or stamp duties could have an adverse effect on our financial condition and results of operations.

***14. Our business is subject to various operating risks at our project sites, the occurrence of which can affect our results of operations and consequently, financial condition of our Company.***

Any shortage of adequate labour due to any labour related issues may affect smooth running of our operations and we may not be able to meet our project timelines. We maintain cordial relationship with the labour and have not encountered any work stoppages and other labour problems so far.

***16. Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus of products, which could harm our business.***

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we must make production decisions well in advance of sales. An inaccurate forecast of demand for any product can result in the unavailability/surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs,

negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. There may be more than one such inaccurate forecasts in one season. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

**17. *Orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our services, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such services or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such services, resulting from our customers discretion or problems we encounter in the delivery of such services or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such services can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

**18. *There have been several instances of delay/ default in payment of statutory dues and filing of statutory returns by our Company in the past.***

There have been several instances of delay/ default in payment of statutory dues including Income Tax payments, Tax deducted at source by our Company in the past which were not material in nature. For the last three Fiscals there has been generally delay in depositing undisputed statutory dues such as Tax deducted at source and Income Tax due to several reasons including liquidity issues. For instance, for the Fiscals 2021-2022, 2020-2021, Income Tax is not yet paid. For the Fiscals 2022-2023, 2021-2021 and 2020-2021, Tax deducted at source is not yet paid. We cannot assure you that there will be no default or delay in future in payment of such statutory dues. Further, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by respective statutory authorities on account of such delay in payments or filing of returns, which may adversely affect our business, financial condition, and reputation.

Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

**20. *We operate in a competitive environment and face fair competition in our business from organized and unorganized players, which may adversely affect our business operations and financial condition.***

The industry in which the Company operates is fairly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins, lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. The domestic segment which we cater to is fragmented and fairly competitive. We compete primarily on the basis of quality of our services, customer satisfaction and marketing. greater market penetration, which may allow our competitors to better respond to market trends. They may also have the ability to spend more aggressively on marketing initiatives and may have more flexibility to respond to changing business and economic conditions than we do. We believe that in order to compete effectively, we must continue to maintain our reputation, be flexible and prompt in responding to rapidly changing market demands and customer preferences, and issue customer quality services at competitive prices. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

***22. Our inability to effectively implement our growth strategies or manage our growth could have an adverse effect on our business, results of operations and financial condition.***

Our growth strategy envisages a very strong asset size and operational income growth. However, there could be a possibility that we may not grow at a comparable rate to our growth rate in the past or the required growth rate to effectively compete in the market either in terms of profit or income. Further, such growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls and more importantly adhering to quality and high standards that meet customer expectations. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

***23. If we are unable to raise additional capital for our business, it may delay our Company's growth plan and have a material adverse effect on our business and financial condition.***

We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, if we are unable to arrange adequate financing on timely basis, it could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and regulatory framework that allows us to raise capital. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations and it may also lead to delay in deployment of funds as per the schedule of implementation as disclosed in objects section titled "Objects of the Issue" on page no. 63 in the Draft Prospectus. In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by redeploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

**41. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we were not required to incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. Failure of our Company to meet the listing requirements of stock exchange, if any, could lead to imposition of penalties, including suspension of trading in shares of the Company.

**42. *The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.***

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures have been lifted. We proactively engaged with our clients to reassure them and to demonstrate our commitment to restart our operations and to build confidence in the safety protocols deployed at our stores. Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this period of lockdown and relaxation, our stores were partially operational. If we do not respond appropriately to the pandemic, or if customers did not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future.

We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus' impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

**43. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet.***

We have not commissioned an industry report, for the disclosures which need to be made in the chapter titled “Industry Overview” on page 78 of this Draft Prospectus. We have made disclosures in the said chapter on the basis of the relevant industry related data available online. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Prospectus. Although we believe that the data may be considered to be reliable, their accuracy, completeness and underlying assumptions are not guaranteed and their dependability cannot be assured. While we have taken reasonable care in the reproduction of the information, the information has not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we make no representation or warranty, express or implied, as to the accuracy or completeness of such facts and statistics. Further, the industry data mentioned in this Prospectus or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

**RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHARE HOLDERS**

**44. *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Issue, our Promoters, along with our Promoter Group members, will hold, approximately 69 % of our post issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholder. By exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company’s or your best interests. For further details, please refer to the chapters titled “Capital Structure” and “Our Promoter, Promoter Group and Group Companies”, beginning on page no. 52 and 136 respectively, of this Draft Prospectus.

**45. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 144 of this Draft Prospectus.

**46. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

**47. *Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors' shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

**48. *Investors may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic stock exchange on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized stock exchange and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to "Statement of Tax Benefits" on page no. 75 of this Draft Prospectus.

**49. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.***

Prior to this Issue, there has been no public market for our Equity Shares. [•] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the section titled "General Information – Details of the Market Making Arrangement for this Issue" on page no. 50 of this Draft Prospectus.

**50. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.***

There has been no public market for our Equity Shares prior to the Offer. The price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on Emerge Platform of NSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue.

Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations, and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

## **EXTERNAL RISK FACTORS**

### ***51. Any changes in the regulatory framework could adversely affect our operations and growth prospects.***

The company is subject to various regulations and policies. For details see section titled “Key Industry Regulations” beginning on page no. 112 of this Prospectus. The company's current businesses and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that it will succeed in obtaining all requisite regulatory approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which could have a material adverse effect on the business, financial condition and results of operations.

### ***52. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

### ***53. Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.***

Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see “Presentation of Financial, Industry and Market Data” on page no. 14 of this Draft Prospectus. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

***54. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

***55. Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us,

thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

***56. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.***

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

***57. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

***58. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

***59. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

***60. Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, ***including*** in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

### WORLD ECONOMIC OVERVIEW

Tentative signs in early 2023 that the world economy could achieve a soft landing—with inflation coming down and growth steady—have receded amid stubbornly high inflation and recent financial sector turmoil. Although inflation has declined as central banks have raised interest rates and food and energy prices have come down, underlying price pressures are proving sticky, with labor markets tight in a number of economies. Side effects from the fast rise in policy rates are becoming apparent, as banking sector vulnerabilities have come into focus and fears of contagion have risen across the broader financial sector, including nonbank financial institutions. Policymakers have taken forceful actions to stabilize the banking system.

In parallel, the other major forces that shaped the world economy in 2022 seem set to continue into this year, but with changed intensities. Debt levels remain high, limiting the ability of fiscal policymakers to respond to new challenges. Commodity prices that rose sharply following Russia’s invasion of Ukraine have moderated, but the war continues, and geopolitical tensions are high. Infectious COVID-19 strains caused widespread outbreaks last year, but economies that were hit hard—most notably China—appear to be recovering, easing supply-chain disruptions. Despite the fillips from lower food and energy prices and improved supply-chain functioning, risks are firmly to the downside with the increased uncertainty from the recent financial sector turmoil.

The baseline forecast, which assumes that the recent financial sector stresses are contained, is for growth to fall from 3.4 percent in 2022 to 2.8 percent in 2023, before rising slowly and settling at 3.0 percent five years out—the lowest medium-term forecast in decades. Advanced economies are expected to see an especially pronounced growth slowdown, from 2.7 percent in 2022 to 1.3 percent in 2023. In a plausible alternative scenario with further financial sector stress, global growth declines to about 2.5 percent in 2023—the weakest growth since the global downturn of

2001, barring the initial COVID-19 crisis in 2020 and during the global financial crisis in 2009—with advanced economy growth falling below 1 percent. The anemic outlook reflects the tight policy stances needed to bring down inflation, the fallout from the recent deterioration in financial conditions, the ongoing war in Ukraine, and growing geoeconomic fragmentation. Global headline inflation is set to fall from 8.7 percent in 2022 to 7.0 percent in 2023 on the back of lower commodity prices, but underlying (core) inflation is likely to decline more slowly. Inflation’s return to target is unlikely before 2025 in most cases. Once inflation rates are back to targets, deeper structural drivers will likely reduce interest rates toward their pre-pandemic levels.

Risks to the outlook are heavily skewed to the downside, with the chances of a hard landing having risen sharply. Financial sector stress could amplify and contagion could take hold, weakening the real economy through a sharp deterioration in financing conditions and compelling central banks to reconsider their policy paths. Pockets of sovereign debt distress could, in the context of higher borrowing costs and lower growth, spread and become more systemic. The war in Ukraine could intensify and lead to more food and energy price spikes, pushing inflation up. Core inflation could turn out more persistent than anticipated, requiring even more monetary tightening to tame. Fragmentation into geopolitical blocs has the scope to generate large output losses, including through its effects on foreign direct investment.

Policymakers have a narrow path to walk to improve prospects and minimize risks. Central banks need to remain steady with their tighter anti-inflation stance, but also be ready to adjust and use their full set of policy instruments—including to address financial stability concerns—as developments demand. Fiscal policymakers should buttress monetary and financial policymakers’ actions in getting inflation back to target while maintaining financial stability. In most cases, governments should aim for an overall tight stance while providing targeted support to those struggling most with the cost-of-living crisis. In a severe downside scenario, automatic stabilizers should be allowed to operate fully and temporary support measures be utilized as needed, fiscal space permitting. Medium-term debt sustainability will require well-timed fiscal consolidation but also debt restructuring in some cases (Chapter 3). Currencies should be allowed to adjust to changing fundamentals, but deploying capital flow management policies on outflows may be warranted in crisis or imminent crisis circumstances, without substituting for needed macroeconomic policy adjustment. Measures to address structural factors impeding supply could ameliorate medium-term growth. Steps to strengthen multilateral cooperation are essential to make progress in creating a more resilient world economy, including by bolstering the global financial safety net, mitigating the costs of climate change, and reducing the adverse effects of geoeconomic fragmentation.

## **INDIAN ECONOMIC OVERVIEW**

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India’s recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector’s success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

### **Market Size**

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

### **Recent Developments**

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion).

### **Government Initiatives**

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In June 2022, Prime Minister Mr. Narendra Modi inaugurated and laid the foundation stone of development projects worth Rs. 21,000 crore (US\$ 2.63 billion) at Gujarat Gaurav Abhiyan at Vadodara.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).

- In August 2022, a Special Food Processing Fund of Rs. 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In November 2020, the Government of India announced Rs. 2.65 lakh crore (US\$ 36 billion) stimulus package to generate job opportunities and provide liquidity support to various sectors such as tourism, aviation, construction, and housing. Also, India's cabinet approved the production-linked incentives (PLI) scheme to provide ~Rs. 2 trillion (US\$ 27 billion) over five years to create jobs and boost production in the country.
- Numerous foreign companies are setting up their facilities in India on account of various Government initiatives like Make in India and Digital India. Prime Minister of India Mr. Narendra Modi launched the Make in India initiative with an aim to boost the country's manufacturing sector and increase the purchasing power of an average Indian consumer, which would further drive demand and spur development, thus benefiting investors. The Government of India, under its Make in India initiative, is trying to boost the contribution made by the manufacturing sector with an aim to take it to 25% of the GDP from the current 17%. Besides, the government has also come up with the Digital India initiative, which focuses on three core components: the creation of digital infrastructure, delivering services digitally, and increasing digital literacy.

### **Road Ahead**

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

### **INFRASTRUCTURE INDUSTRY**

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress. Infrastructure is a key enabler in helping India become a US\$ 26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors. The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway. Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The “Smart Cities Mission” and “Housing for All” programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining. Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India’s overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India’s economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure and construction development projects.

In order to meet India’s aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as ‘Make in India’ and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country’s infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation. While these sectors still remain the key focus, the government has also started to focus on other sectors as India’s environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

### **Market Size**

In Budget 2023-24, capital investment outlay for infrastructure is being increased by 33% to Rs.10 lakh crore (US\$ 122 billion), which would be 3.3% of GDP. Started with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 in the roads and bridges sub-sector.

The Indian Railways expects to complete total revenue of Rs. 2,35,000 crore (US\$ 28.3 billion) by the end of fiscal year 2022-23. The overall revenue of Indian Railways at the end of August’22 was Rs. 95,486.58 crore (US\$ 11.5 billion), showing an increase of Rs. 26,271.29 crore (US\$ 3.1 billion) (38%) over the corresponding period of last year. India’s logistics market is estimated to reach US\$ 410.75 billion in 2022 and is expected to reach US\$ 556.97 billion by 2027, growing at a CAGR of 6.28%. India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years. In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.

India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. Metro rail network reached 810 kms and is operational in 20 cities as of September 2022. At almost 20 kms, Mumbai monorail is the third largest route in the world after China with 98 kms and Japan with 28 kms. India plans to spend US\$ 1.4 trillion on infrastructure through ‘National Infrastructure Pipeline’ in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of 22 August, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban). Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country’s increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over FY21-26 driven by spending on water supply, transport and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the 10th five year plan as against 9% in the 11th five year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India’s planning commission during the 12th five year plan, with 40% of the funds coming from the private sector.

### **Estimated Potential**

The total asset pipeline under NMP over the four-year period, 2022-2025, is estimated to be US\$ 72.76 billion (Rs 6 lakh crore). The expected value is equal to 14% of the outlay proposed under the centrally sponsored initiative NIP US\$ 520.20 billion (Rs 43 lakh crore). Moreover, there are more than 20 asset classes and over 12-line ministries. The industries covered include roads, ports, airports, railways, warehousing, gas and product pipelines, power generation and transmission, mining, telecommunications, stadiums, hospitality, and housing.

In the below image, NITI Aayog has represented the breakup of US\$ 72.76 billion (Rs 6 lakh crore) and total indicative value sector-wise over the period of four years (FY22-25). The total indicative value over the four years (FY22-25)

of roads is estimated at US\$ 19.40 billion (Rs 1.60 lakh crore) and railways are estimated at US\$ 18.43 billion (Rs 1.52 lakh crore), contributing 52% of the total NMP value.

### **Current Status**

In the fiscal year 2021-22, the government surpassed its goals of US\$ 10.88 billion (Rs 90,000 crore), achieving a monetisation revenue of 67.5% more amounting to US\$ 11.7 billion (Rs 97,000 crore) and is expected to reach US\$ 12.12 billion (Rs 1 lakh crore). Out of which, roads accounted for 24% of the total revenue followed by power with 10%, mining made up about 61% and coal mines accounted for about 41%. Additionally, these include 22 coal blocks, 31 mineral blocks, 390 km of road in InvIT, three toll-operate-transfer (TOT) concessions, transmission assets of PowerGrid, and an operational hydel project of NHPC.

In the fiscal year 2022-23, the Union government is likely to meet its asset monetisation target of US\$ 19.40 billion (Rs 1.62 trillion) as the mining industry is experiencing a rush of brand-new private-sector projects and is anticipated to do the heavy lifting. Compared to a target of just US\$ 733.12 million (Rs 6,060 crore), the monetisation value from the mining industry, which includes coal and other minerals, is anticipated to be above US\$ 7.25 billion (Rs 60,000 crore) in FY23. But, only slightly more than a third US\$ 6.93 billion (Rs 57,222 crore) of the railways' monetisation target is expected to be met.

### **Future Prospectus**

- To monetize assets worth US\$ 606.38 million (Rs 5,000 crore), Gas Authority Of India (GAIL) Limited, has submitted a new infrastructure investment route (InvIT) proposal.
- In accordance with the "National Monetization Pipeline (NMP)," the Ministry of Civil Aviation intends to lease out 25 airports owned by the Airports Authority of India (AAI) between 2022 and 2025. Eight airports in all have already been leased under Public Private Partnership (PPP) on a long-term lease basis for operation, management, and development. Delhi, Mumbai, Ahmedabad, Guwahati, Jaipur, Lucknow, Mangalore, and Thiruvananthapuram are the airports on this list. The airports in Delhi and Mumbai were leased out in 2006, and in 2020, the concessionaires received control of the airports in Mangalore, Lucknow, and Ahmedabad. In 2021, leases were signed for the airports in Guwahati, Jaipur, and Thiruvananthapuram.
- At least six mineral blocks, including four iron ore mines, are scheduled to be placed up for auction by the central government in 2023.
- The Ministry of Road and Transport has identified a list of 1,750 km of projects that would be monetized through ToT and InVIT in FY23. The National Highways Infra Trust of India (NHAI InVIT) intends to collect US\$ 909.58-970.22 million (Rs 75-80 billion) by selling the next tranche of six road assets by March 2023.

### **Road Ahead**

India has to enhance its infrastructure to reach its 2025 economic growth target of US\$ 5 trillion. India's population growth and economic development requires improved transport infrastructure, including through investments in roads, railways, and aviation, shipping and inland waterways.

The government has also suggested an investment of \$750 billion to strengthen railway infrastructure, and envisioned the Maritime India Vision 2030 which estimates massive investments in world-class infrastructure development at Indian ports. Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the North East are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure. India, it is estimated, needs to invest \$840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports and airports.

As a result of digitalisation and opportunities that tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information

technology enabled services and banking financial services and insurance focused organizations are increasingly decentralizing their operations to adapt to the new normal.

The residential sector has witnessed good sales, and launches have also shown signs of an uptick during 2022, total sales in the top-7 cities was projected to exceed 360,000 units in 2022. Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while top 31 Indian cities will have two operational airports each. 220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India. 102 critical projects under the Gati Shakti masterplan worth \$7.67 billion are to be completed by 2024, making 2023 a critical year for effective execution and celerity of completion. India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others.

The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom as a result of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector. The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region. India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

## **AGRICULTURE INDUSTRY**

### **Introduction**

India is one of the major players in the agriculture sector worldwide and it is the primary source of livelihood for ~55% of India's population. India has the world's largest cattle herd (buffaloes), largest area planted to wheat, rice, and cotton, and is the largest producer of milk, pulses, and spices in the world. It is the second-largest producer of fruit, vegetables, tea, farmed fish, cotton, sugarcane, wheat, rice, cotton, and sugar. Agriculture sector in India holds the record for second-largest agricultural land in the world generating employment for about half of the country's population. Thus, farmers become an integral part of the sector to provide us with means of sustenance.

Consumer spending in India will return to growth in 2021 post the pandemic-led contraction, expanding by as much as 6.6%. The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food processing industry accounts for 32% of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth.

### **Overview of Agriculture in India**

Agriculture plays a significant role in India's growing economy. With around 54.6% of the total workforce involved in agriculture and allied sector activities, the sector contributes to 17.8% of the country's gross value added (GVA). During 2021-22, the country recorded US\$ 50.2 billion in total agriculture exports with a 20% increase from US\$ 41.3 billion in 2020-21. It is projected that the Indian agriculture sector will grow by 3.5% in FY23.

With the use of conventional farming methods, there's comparatively less improvement in efficiency and agricultural yields which resulted in lower productivity. Due to this concern, the government initiated the fourth wave of revolution in the agricultural sector to introduce technological advancement in these activities to improve yields and promote the involvement of the population in this sector.

Agriculture 4.0 is a considerably advanced version of precision farming methods. It has the potential to transform the existing methods of farming. Precision farming focuses on a comprehensive approach towards maintaining the field and soil well-being with a focus on improving the quality and quantity of yield with minimum environmental harm. The idea of revolution in agriculture involves the use of the Internet of Things (IoT), big data, artificial intelligence, and robotics to accelerate and improve the efficiency of activities throughout the entire production chain. It has the potential to transform the conventional farming industry. Conventional farming practices control crop watering and spraying pesticides or fertilisers uniformly across the field. Instead, the farmers will need to be more targeted and data-driven in the context of farming. Future farms will be more productive owing to the employment of robotics, temperature and moisture sensors, aerial photos, and GPS technology. These cutting-edge methods will improve farm profitability, efficiency, safety, and environmental friendliness. They are together referred to as advanced or high-tech precision farming.

Around one-third of food produced for consumption which is worth over US\$ 1 trillion is lost or wasted in transit. This leads to millions of people sleeping hungry every night. The UN World Food Programme reports state that the primary cause of rising hunger around the globe is food wastage or loss due to uneven handling of food.

The concern about food wastage gave rise to the involvement of technology in agriculture to improve productivity and reduce wastage by proper handling of food. The data analytics and AI will help farmers to monitor the activities of seeds to the final crop. This will result in better yield and as a result, people will be involved in agriculture and eventually, the nation will target the least hunger issues. These challenges led to the introduction of Agriculture 4.0 wherein farmers won't be dependent on water facilities, fertilizers, and pesticides uniformly across entire fields. Instead, farmers will be suggested to use minimum quantities and target specific areas for different crops to get better productivity.

### Market Size

According to Inc42, the Indian agricultural sector is predicted to increase to US\$ 24 billion by 2025. Indian food and grocery market is the world's sixth largest, with retail contributing 70% of the sales. As per First Advance Estimates for FY23 (Kharif only), total foodgrain production in the country is estimated at 149.92 million tonnes. Rapid population expansion in India is the main factor driving the industry. The rising income levels in rural and urban areas, which have contributed to an increase in the demand for agricultural products across the nation, provide additional

support for this. In accordance with this, the market is being stimulated by the growing adoption of cutting-edge techniques including blockchain, artificial intelligence (AI), geographic information systems (GIS), drones, and remote sensing technologies, as well as the release of various e-farming applications. In terms of exports, the sector has seen good growth in the past year. In FY22

- Exports of marine products stood at US\$ 7.77 billion.
- Exports of rice (Basmati and Non-Basmati) stood at US\$ 6.98 billion.

## **Advantage India**

### **Robust Demand**

Factors contributing towards the sharp growth in demand for processed foods include the increasing urbanization, increasing disposable incomes, changing spending patterns/ priorities, emergence of nuclear families and the growing need for convenience foods in dual income nuclear families.

### **Advantage**

India has access to several natural resources that provides it a competitive advantage in the food processing sector . Due to its diverse agro -climatic conditions, it has a wide -ranging and large raw material base suitable for food processing industries.

### **Policy support**

Online, Competitive, Transparent Bidding System with 1 .74 crore farmers and 2 .39 lakh traders put in place under the National Agriculture Market (e -NAM) Scheme.

### **Attractive opportunities**

Entry of foreign players have been key to sustainable growth in some sectors such as dairy. Indian consumers are rapidly changing their eating habits . Trends indicate a sharp increase in on -the go eating, snacking in between meals, switching to healthier eating alternatives, pre - cooked ready to eat meals and increasing consumption of organic foods.

This has led to a host of new opportunities in the consumer foods market for both domestic and international companies to build a stake in this fast -growing processed food market.

## Growth in Agriculture

### Major Seasons: Kharif and Rabi

- There are two major agricultural seasons in India: Kharif and Rabi.
- Kharif season lasts from April to September (summer) - rice (paddy) is the season's main crop and rabi season lasts from October to March (winter) - wheat is the season's main crop.

- Monitoring of rabi crops sowing revealed that as on December 9, 2022, area sown under rabi crops has increased from 457.80 to 526.27 lakh hectares. Out of 68.47 lakh hectares increase in all rabi crops, increase in wheat area is 51.85 lakh hectares from 203.91 to 255.76 lakh hectares.
- The production of kharif foodgrains in 2022-23, as per the First Advance Estimates (AE), is estimated at 149.9 million tonnes, 3.9% lower than kharif foodgrains production of 156.0 million tonnes in 2021-22. As of October 27, 2021, the total rabi area stood at 0.53 lakh hectares.

### **Increasing Production**

- As per First Advance Estimates for FY23 (Kharif only), total foodgrain production in the country is estimated at 149.92 million tonnes.
- India's agriculture exports touched a historic high of US\$ 50 billion (FY22). The highest-ever exports were achieved for staples like rice, wheat, sugar, other cereals and meat.
- As per the provisional figures released by the Directorate General of Commercial Intelligence and Statistics (DGCI&S), agricultural exports have grown by 19.92% during 2021-22 to touch US\$ 50.21 billion. This remarkable feat has been made possible on the shoulders of several key initiatives taken by the Central government to increase the production of food grains in recent years.

### Rising demand of Indian products in international market

#### 1. Changing Consumer Tastes

The demand for fresh and processed products of all types is increasing as the population urbanizes, incomes rise, and consumption habits change.

#### 2. Expansion Of International Companies

Nestlé plans to invest Rs. 50 billion (US\$ 613 million) in India by 2025 to accelerate its existing business in the country and capitalize on new growth opportunities.

#### 3. Rising Demand On Indian Products In International Market

In November 2019, Haldiram entered into an agreement for Amazon's global selling program to E-tail its delicacies in the United States.

#### 4. Emphasis On Healthier Ingredients

Food processing companies are serving health and wellness as a new ingredient in processed food because of it being low on carbohydrates and cholesterol, for example, zero-% trans fat snacks and biscuits, slim milk, and whole wheat products, etc.

#### 5. Higher Consumption Of Horticulture Crops

According to the second advance estimate of horticulture production released by the Ministry of Agriculture, India is expected to have the highest ever horticulture production.

## **6. Product Innovation As The Key To Expansion**

Heritage Foods, a Hyderabad-based company, has plans to add five more milk processing units in the next five years for an investment of US\$ 22.31 million as part of its expansion plan to achieve US\$ 1 billion turnover by 2022.

## **7. Strengthening Procurement Via Direct Farmer-Firm Linkages**

As diversification towards high value horticulture crops is emerging as a major growth factor in agriculture, direct marketing by establishing farmer-consumer markets will help farmers realize better price.

## **8. Horticulture Output/Outlook**

The Indian agricultural sector is slowly shifting from traditional farming to horticulture and livestock production (poultry, dairy, and fisheries).

### **Strategies Adopted**

#### **1. Rising business and product innovation**

India's food service market is expected to reach US\$ 79.65 billion by 2028, growing at a CAGR of 11.19% from US\$ 41.1 billion in 2022. The government is promoting the use of drones in agriculture by providing financial assistance through the 'Sub-Mission on Agriculture Mechanization. Government aims to make India a global hub for 'Shree Anna', the Indian Institute of Millet Research, Hyderabad will be supported as the Centre of Excellence for sharing best practices, research and technologies at the international level. National Agriculture Market (eNAM) is a pan-India electronic trading portal which networks the existing APMC mandis to create a unified national market for agricultural commodities. Integration of APMCs across the country through a common online market platform to facilitate pan-India trade in agriculture commodities, providing better price discovery through transparent auction process based on quality of produce along with timely online payment.

#### **2. Research**

As per the Union Budget 2023-24, government aims to make India a global hub for 'Shree Anna', the Indian Institute of Millet Research, Hyderabad will be supported as the Centre of Excellence for sharing best practices, research and technologies at the international level. Agriculture Accelerator Fund to be set-up to encourage agri-startups by young entrepreneurs in rural area.

#### **3. Low-cost price strategy**

Low-cost price strategy is adopted so as to make the product affordable to consumers by guaranteeing them value for money. For example, to penetrate deeper into the Indian households Kissan adopted a lowcost price strategy also known as penetration pricing strategy to make its products affordable and attractive to the consumers by giving them value for money. The demand for processed foods in India is constrained by low income and sociocultural factors.

### **Growing areas under Irrigation**

- Gross irrigated area under food grains was estimated to reach 64.8 million hectares in FY19.
- Of the wide variety of crops in India,
- rice and wheat are the most irrigated.
- Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) has been formulated with the vision of extending the coverage of irrigation
- ‘Har Khet ko pani’ and improving water use efficiency ‘More crop per
- drop’ in a focused manner with end-
- to-end solution on source creation, distribution, management, field application and extension activities.
- PMKSY has been formulated amalgamating ongoing schemes viz. Accelerated Irrigation Benefit Programme (AIBP) of the Ministry
- of Water Resources, River Development & Ganga Rejuvenation (MoWR,RD&GR), Integrated Watershed Management Programme (IWMP) of Department of Land Resources (DoLR) and the On Farm Water Management (OFWM) of Department of Agriculture and Cooperation (DAC).
- Under PMKSY-Per Drop More Crop, an area of 32.697 lakh hectare (ha) has been covered under micro irrigation in the country
- Under PMKSY-HKRP- Repair, Renovation and Restoration of water bodies (RRR of water bodies), a total of 395 water bodies have been taken up during 2018-2021.
- Climate-Smart Farming Practices: This is slowly gaining acceptance with farmers using clean energy sources like solar for irrigation.

## Opportunities

### 1. Supply chain infrastructure

Technology-driven, integrated supply chains enable entities to reduce inventory and costs, add product value, extend resources, accelerate time to market, expand market, increase pricing for sellers and variety for buyers as well as retain customers. In order to have a successful supply chain, the Indian Government has sought to involve multiple stakeholders to improve interactions between farmers, processors, distributors and retailers. The nation’s processed food industry is expected to grow to US\$ 958 billion by 2025 at a compound annual growth rate (CAGR) of 12%.

## 2. Potential global outsourcing hubs

Huge opportunity exists for agri input segments like seeds and plant growth nutrients. According to the Center for Environment and Agriculture (CENTEGRO) and Crop Care Federation of India (CCFI), India can become the 'global agricultural hub' for other countries, which have harsh weather, scarce labour and lands, and are seeking to outsource their agriculture.

## 3. Farm management services

Given the importance of agriculture in India, both the government and private players are working to improve the efficiency and productivity of Indian agriculture and exploring how Farming as a Service (FaaS) solutions can play a role. FaaS seeks to provide affordable technology solutions for efficient farming. It converts fixed costs into variable costs for farmers, thus making the techniques more affordable for a majority of small farmers. Its services are available on a subscription or pay-per-use basis in three broad categories, which are crucial across the agriculture value chain.

### **Brief write-up on processing of Pulses**

#### **Processing**

Processing of pulses is of primary importance in improving their nutritive value. The processing methods used are soaking, germination decortications, cooking and fermentation.

#### **Soaking**

Soaking in water is the first step in most methods of preparing pulses for consumption. As indicated above, soaking reduces the oligosaccharides of the raffinose family. Soaking also reduces the amount of phytic acid in pulses.

#### **Germination**

Germination improves the nutritive value of food pulses. The ascorbic acid content of pulses increases manifold after 48 hours germination. Germinated and sprouted pulses have been used to prevent and cure scurvy. The riboflavin, niacin, choline and biotin contents of all pulses increase during germination. The germination process reduces and/or eliminates most of the antinutritional and toxic factors in several pulses.

#### **Decortication**

A simple method is to soak the seeds for a short time in water; the husk takes up more water than the seeds and may be easily separated by rubbing while still moist. In the alternative, the soaked grains may be dried and the husk removed by pounding and winnowing. Roasting also renders the husk easier to separate. Roasted legumes like those of Bengal gram and peas are widely used in India.

#### **Cooking**

Cooking destroys the enzyme inhibitors and thus improve the nutritional quality of food pulses. Cooking also improves the palatability.

## **Fermentation**

The processing of food pulses by fermentation increases their digestibility, palatability and nutritive value. Fermentation process improves the availability of essential amino acids and, thus, the nutritional quality of protein of the blend. In general, the nutritive value of the legume based fermented foods has been shown to be higher than their raw counterparts.

## **Pulse milling**

Pulses are usually converted into Dhal by decutlating and splitting. Both dry and wet milling processes are employed. By and large carborundum emery rollers are used for dehusking and burr grinders for splitting. Decuticling is seldom complete in single pass requiring multiple passes, each pass producing 1.5 to 2% fines reducing recovery of dal.

Basic processes in dhal milling are cleaning, dehusking, splitting, separation and bagging. Major variation is involved with dehusking process only. Dhals like Aarahar, urad, moong and lentil are difficult to dehusk as a result repeated operations by dehusking rollers are required. Rewetting and drying is done to loosen portions of husk sticking after repeated rolling. Linseed oil is used to impart shine or better appeal to the milled dal.

The removal of the outer husk and splitting the grain into two equal halves is known as milling of pulses. To facilitate dehusking and splitting of pulses alternate wetting and drying method is used. In India trading milling methods produce dehusked split pulses. Loosening of husk by conditioning is insufficient in traditional methods. To obtain complete dehusking of the grains a large number of abrasive forces is applied in this case as a result high losses occur in the form of brokens and powder. Yield of split & pulses in traditional mills are only 65 to 75% due to the above losses compared to 82 to 85% potential yield.

## **Milling of Pulses**

In India, there are two conventional pulses milling methods; wet milling method and dry milling method. The latter is more popular and used in commercial mills.

### **ii. Basis of Accounting**

The Company maintains its accounts on accrual basis following historical cost convention, except for certain financial instruments that are measured at fair value in accordance with Ind AS. Fair value measurements are categorized as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

**Level 1:** inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the company can access at measurement date;

**Level 2:** inputs are inputs, other than quoted prices included in level 1, that are observable for the asset or liability, either directly or indirectly; and

**Level 3:** inputs are unobservable inputs for the valuation of assets or liabilities. Above level of fair value hierarchy are applied consistently and generally, there are no transfer between the level of the fair value hierarchy unless the circumstances changes warranting such transfers.

### **iii. Presentation of financial statements**

The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed in the Schedule III to the Companies Act, 2013 (“the Act”). The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 “Statement of Cash Flows”. The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with the other notes required to be disclosed under the notified Accounting Standards and the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended.

receivables (including retention monies) within the agreed credit period normally applicable to the respective lines of business.

### **III. Significant Accounting Policies**

#### **(a) Use of judgement and estimates**

The preparation of the financial statements in conformity with Ind AS requires management to make certain estimates, judgements and assumptions. These affect the application of accounting policies, the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the reporting date of the financial statements and reported amounts of income and expenses during the period. Accounting estimates could change from period to period and the actual results could differ from those estimates. These are reviewed by the management on an on-going basis and appropriate changes in estimates are made prospectively as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

The management believes that the estimates used in preparation of these financial statements are just, prudent and reasonable.

#### **(b) Exceptional Items**

An item of income or expense which by its size, type or incidence requires disclosure in order to improve an understanding of the performance of the Company is treated as an exceptional item and disclosed as such in the financial statements.

#### **(c) Property, Plant and Equipment (PPE)**

PPE is recognised when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. PPE is stated at original cost net of tax/duty credits availed, if any, less accumulated depreciation and cumulative impairment, if any. PPE acquired on hire purchase basis are recognised at their cash values. Cost includes professional fees related to the acquisition of PPE and for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy.

Own manufactured PPE is capitalised at cost including an appropriate share of overheads. Administrative and other general overhead expenses that are specifically attributable to construction or acquisition of PPE or bringing the PPE to working condition are allocated and capitalised as a part of the cost of the PPE.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress". (Also refer to policy on leases, borrowing costs, impairment of assets and foreign currency transactions infra).

Depreciation is recognised using Straight line method so as to write off the cost of the assets (other than freehold land and properties under construction) less their residual values over their useful lives specified in Schedule II to the Companies Act, 2013, or in the case of assets where the useful life was determined by technical evaluation, over the useful life so determined. Depreciation method is reviewed at each financial year end to reflect the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life and residual values are also reviewed at each financial year end and the effect of any change in the estimates of useful life/ residual value is accounted on prospective basis.

Where cost of a part of the asset ("asset component") is significant to total cost of the asset and useful life of that part is different from the useful life of the remaining asset, useful life of that significant part is determined separately and such asset component is depreciated over its separate useful life.

Depreciation on additions to/deductions from, owned assets is calculated pro rata to the period of use. Extra shift depreciation is provided on a location basis.

Depreciation charge for impaired assets is adjusted in future periods in such a manner that the revised carrying amount of the asset is allocated over its remaining useful life. Assets acquired under finance leases are depreciated on a straight line basis over the lease term. Where there is reasonable certainty that the Company shall obtain ownership of the assets at the end of the lease term, such assets are depreciated based on the useful life adopted by the Company for similar assets.

Freehold land is not depreciated

Such classes of assets and their estimated useful lives are as under:

The Company does not have a program of verification to cover all the items of fixed assets in a phased manner. Fixed assets were not physically verified by the management during the year.

#### **(d) Revenue Recognition**

**Ind AS 115:** The objective of this Standard is to establish the principles that an entity shall apply to report useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from a contract with a customer.

#### **Identifying the Contract**

An entity shall account for a contract with a customer that is within the scope of this Standard only when all of the following criteria are met:

- (a) the parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations;
- (b) the entity can identify each party's rights regarding the goods or services to be transferred;
- (c) the entity can identify the payment terms for the goods or services to be transferred;
- (d) the contract has commercial substance (ie the risk, timing or amount of the entity's future cash flows is expected to change as a result of the contract); and
- (e) it is probable that the entity will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer. In evaluating whether collectability of an amount of consideration is probable, an entity shall consider only the customer's ability and intention to pay that amount of consideration when it is due. The amount of consideration to which the entity will be entitled may be less than the price stated in the contract if the consideration is variable because the entity may offer the customer a price concession.

#### **Identifying Performance Obligation:**

At contract inception, an entity shall assess the goods or services promised in a contract with a customer and shall identify as a performance obligation each promise to transfer to the customer either: (a) a good or service (or a bundle of goods or services) that is distinct; or 596 (b) a series of distinct goods or services that are substantially the same and that have the same pattern of transfer to the customer.

#### **Satisfaction of performance obligations:**

An entity shall recognise revenue when (or as) the entity satisfies a performance obligation by transferring a promised good or service (i.e. an asset) to a customer. An asset is transferred when (or as) the customer obtains control of that asset.

#### **Performance obligations satisfied over time:**

When either party to a contract has performed, an entity shall present the contract in the balance sheet as a contract asset or a contract liability, depending on the relationship between the entity's performance and the customer's payment. An entity shall present any unconditional rights to consideration separately as a receivable.

#### **Measurement:**

When (or as) a performance obligation is satisfied, an entity shall recognise as revenue the amount of the transaction price (which excludes estimates of variable consideration) that is allocated to that performance obligation.

#### **Determining the transaction price:**

An entity shall consider the terms of the contract and its customary business practices to determine the transaction price. The transaction price is the amount of consideration to which an entity expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties (for example, some sales taxes). The consideration promised in a contract with a customer may include fixed amounts, variable amounts, or both.

#### **(e) Investments**

Under Ind AS, these financial assets have been classified as Fair Value through Profit or Loss (FVTPL) on the date of transition and fair value changes after the date of transition has been recognised in profit or loss.

#### **(f) Fair value measurement**

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties.

The following methods and assumptions were used to estimate the fair values:

- (a) Fair value of current assets which includes loans given, cash and cash equivalents, other bank balances and other financial assets - approximate their carrying amounts.
- (b) Financial instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for expected losses of these receivables. Accordingly, fair value of such instruments is not materially different from their carrying amounts.

#### **(g) Financial Instruments**

Financial assets and/or financial liabilities are recognised when the company becomes party to a contract embodying the related financial instruments. All financial assets, financial liabilities and financial guarantee contracts are initially measured at transaction values and where such values are different from the fair value, at fair value. Transaction costs that are attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from as the case may be, the fair value of such financial assets or liabilities, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in Profit or Loss.

In case of funding to subsidiary companies in the form of interest free or concession loans and preference shares, the excess of the actual amount of the funding over initially measured fair value is accounted as an equity investment.

A financial asset and a financial liability is offset and presented on net basis in the balance sheet when there is a current legally enforceable right to set-off the recognised amounts and it is intended to either settle on net basis or to realise the asset and settle the liability simultaneously.

#### **(h) Financial Assets**

- A) All recognised financial assets are subsequently measured in their entirety either at amortised cost or at fair value depending on the classification of the financial assets as follows:
  - i) Investments in debt instruments that are designated as fair value through profit or loss (FVTPL) - at fair value.
  - ii) Investments in debt instruments that meet the following conditions are subsequently measured at - at amortised cost (unless the same designated as fair value through profit or loss):  
The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and the contractual terms of instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
  - iii) Investment in debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income [FVTOCI] (unless the same are designated as fair value through profit or loss). The asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and the contractual terms of

- instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- iv) Debt instruments at FVTPL is a residual category for debt instruments, if any, and all changes are recognised in profit or loss.
  - v) Investment in equity instruments issued by subsidiary, associate and joint venture companies are measured at cost less impairment.
  - vi) Investment in preference shares of the subsidiary companies are treated as equity instruments if the same are convertible into equity shares or are redeemable out of the proceeds of equity instruments issued for the purpose of redemption of such investments. Investment in preference shares not meeting the aforesaid conditions are classified as debt instruments at FVTPL.
  - vii) Investments in equity instruments are classified as at FVTPL, unless the related instruments are not held for trading and the Company irrevocably elects on initial recognition to present subsequent changes in fair value in Other Comprehensive Income.
- B) For financial assets that are measured at FVTOCI, income by way of interest and dividend, provision for impairment and exchange difference, if any, (on debt instrument) are recognised in profit or loss and changes in fair value (other than on account of above income or expense) are recognised in other comprehensive income and accumulated in other equity. On disposal of debt instruments at FVTOCI, the cumulative gain or loss previously accumulated in other equity is reclassified to profit or loss. In case of equity instruments at FVTOCI, such cumulative gain or loss is not reclassified to profit or loss on disposal of investments.
- C) A financial asset is primarily derecognised when:
- i) the right to receive cash flows from the asset has expired, or
  - ii) the company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement; and (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.
  - iii) On derecognition of a financial asset in its entirety, the difference between the carrying amounts measured at the date of derecognition and the consideration received is recognised in Profit or Loss.
- D) Impairment of financial assets: The Company recognises impairment loss on trade receivables using expected credit loss model, which involves use of a provision matrix constructed on the basis of historical credit loss experience as permitted under Ind AS 109. Impairment loss on investments is recognised when the carrying amount exceeds its recoverable amount.
- i) Financial Liabilities: Financial liabilities, including derivatives and embedded derivatives, which are designated for measurement at FVTPL are subsequently measured at fair value. Financial guarantee contracts are subsequently measured at the amount of impairment loss allowance or the amount recognised at inception net of cumulative amortisation, whichever is higher. All other financial liabilities including loans and borrowings are measured at amortised cost using Effective Interest Rate (EIR) method. A financial liability is derecognised when the related obligation expires or is discharged or cancelled.

**(i) Inventories**

**Inventories are valued after providing for obsolescence, as under:**

- i) Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost.
- ii) Manufacturing work-in-progress at lower of weighted average cost including related overheads or net realisable value. In some cases, manufacturing work-in-progress are valued at lower of specifically identifiable cost or net realisable value. In the case of qualifying assets, cost also includes applicable borrowing costs vide policy relating to borrowing costs.

- iii) Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes related overheads and GST paid/payable on such goods.
- iv) Completed property/work-in-progress (including land) in respect of property development activity at lower of specifically identifiable cost or net realisable value.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

#### **(j) Cash and Bank Balances**

Cash and bank balances also include fixed deposits, margin money deposits, earmarked balances with banks and other bank balances which have restrictions on repatriation. Short term and liquid investments being subject to more than insignificant risk of change in value, are not included as part of cash and cash equivalents. The current charge for income tax is calculated in accordance with the relevant tax regulations applicable to the Company.

#### **(k) Securities Premium Account**

Securities premium includes (i) The difference between the face value of the equity shares and the consideration received in respect of shares issued; (ii) The issue expenses of securities which qualify as equity instruments are written off against securities premium account.

#### **(l) Employee Benefits**

**(i) Short Term Employee Benefits:** Employee benefits such as salaries, wages, short term compensated absences, expected cost of bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short term employee benefits and are expensed in the period in which the employee renders the related service.

#### **(ii) Post Employment Benefits:**

(a) Defined contribution plans: The Company's superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the related service.  
(b) Defined Benefit Plans: The employees' gratuity fund schemes and employee provident fund schemes managed by board of trustees established by the Company, the post-retirement medical care plan and the Company pension plan represent defined benefit plans. The present value of the obligation under defined benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows using a discount rate based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the defined benefit obligations at the Balance Sheet date.

Re-measurement, comprising actuarial gains and losses, the return on plan assets (excluding amounts included in net interest on the net defined benefit liability or asset) and any change in the effect of asset ceiling (if applicable) is recognised in other comprehensive income and is reflected in retained earnings and the same is not eligible to be reclassified to profit or loss. Defined benefit costs comprising current service cost, past service cost and gains or losses on settlements are recognised in the Statement of Profit and Loss as employee benefits expense. Interest cost implicit in defined benefit employee cost is recognised in the Statement of Profit and Loss under finance cost. Gains or losses on settlement of any defined benefit plan are recognised when the settlement occurs. Past service cost is recognised as expense at the earlier of the plan amendment or curtailment and when the company recognises related restructuring costs or termination benefits.

In case of funded plans, the fair value of the plan assets is reduced from the gross obligation under the defined benefit plans to recognise the obligation on a net basis.

### **(iii) Long Term Employee benefits:**

The obligation recognised in respect of long term benefits such as compensated absences, long service award etc. is measured at present value of estimated future cash flows expected to be made by the Company and is recognised in a similar manner as in the case of defined benefit plans vide (ii)(B) supra. Long term employee benefit costs comprising current service cost and gains or losses on curtailments and settlements, re-measurements including actuarial gains and losses are recognised in the Statement of Profit and Loss as employee benefit expenses. Interest cost implicit in long term employee benefit cost is recognised in the Statement of Profit and Loss under finance cost.

### **(iv) Terminal Benefits:**

Termination benefits such as compensation under employee separation schemes are recognised as expense when the Company's offer of the termination benefit is accepted or when the Company recognises the related restructuring costs whichever is earlier.

### **(m) Taxes on Income**

Tax on income for the current period is determined on the basis of taxable income and tax credits computed in accordance with the provisions of the Income Tax Act, 1961 and based on the expected outcome of assessments/appeals.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in computation of taxable profit and quantified using the tax rates and laws enacted or substantively enacted as on the Balance Sheet date.

Deferred tax liabilities are generally recognised for all taxable temporary differences including the temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are generally recognised for all taxable temporary differences to the extent that is probable that taxable profits will be available against which those deductible temporary differences can be utilised. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets relating to unabsorbed depreciation/business losses/losses under the head "capital gains" are recognised and carried forward to the extent of available taxable temporary differences or where there is convincing other evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of reporting period, to recover or settle the carrying amount of its assets and liabilities.

Transaction or event which is recognised outside Profit or Loss, either in Other Comprehensive Income or in equity, is recorded along with the tax as applicable.

### **(n) Leases**

Ind AS 116 – Leases which sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract and replaces the previous standard on leasing, Ind AS 17 – Leases. Ind AS 116 eliminates the classification of leases for the lessee as either operating leases or finance leases as required by Ind AS 17 and instead, introduces a single lessee accounting model whereby a lessee is required to recognise assets and liabilities for all leases with a term that is greater than 12 months, unless the underlying asset is of low value, and to recognise depreciation of leased assets separately from interest on lease liabilities in the income statement.

The accounting by lessors under the new standard is substantially unchanged from today's accounting in Ind AS 17. Lessors classify all leases using the same classification principle as in IAS 17 and distinguish between two types of leases: operating and finance leases. For operating leases, lessors continue to recognize the underlying asset. For finance leases, lessors derecognize the underlying asset and recognize a net investment in the lease similar to today's requirements. Any selling profit or loss is recognized at lease commencement.

#### **(o) Provisions, contingent Liabilities and Contingent Assets**

Provisions are recognised only when

- (j) the Company has a present obligation (legal or constructive) as a result of a past event; (ii) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and (iii) a reliable estimate can be made of the amount of the obligation. Provision is measured using the cash flows estimated to settle the present obligation and when the effect of time value of money is material, the carrying amount of the provision is the present value of those cash flows. Reimbursement expected in respect of expenditure required to settle a provision is recognised only when it is virtually certain that the reimbursement will be received.

Contingent liability is disclosed in case of:

- (i) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and
- (ii) a present obligation arising from past events, when no reliable estimate is possible. Contingent assets are disclosed where an inflow of economic benefits is probable.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

Where the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under such contract, the present obligation under the contract is recognised and measured as a provision.

#### **(p) Statement of Cash Flows**

Statement of Cash Flows is prepared segregating the cash flows into operating, investing and financing activities. Cash flow from operating activities is reported using indirect method, adjusting the profit before tax excluding exceptional items for the effects of:

- (i) changes during the period in inventories and operating receivables and payables transactions of a non-cash nature;
- (ii) non-cash items such as depreciation, provisions, unrealised foreign currency gains and losses; and
- (iii) all other items for which the cash effects are investing or financing cash flows.

Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as at the date of Balance Sheet.

#### **(q) Changes Accounting Policies In The Years/Periods Covered In The Restated Financial**

There is no change in significant accounting policies during the reporting period except, as and when Accounting Standards issued by the Institute of Chartered Accountants of India / Companies (Accounting Standard) Rules, 2006 were made applicable on the relevant dates.

#### **(r) Notes To Reconciliation Of Restated Profit**

#### ***Phased implementation of Unified Payments Interface***

SEBI has issued a ***UPI Circulars*** in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

**Phase I:** This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Applicant would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six Working Days.

**Phase II:** This phase commenced on completion of Phase I i.e. with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Applicant through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

**Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to be three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Issue.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers are to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to

₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers. Subsequently, pursuant to SEBI circular no SEBI/HO/CFD/DIL2/P/CIR/2022/75 dated May 30, 2022, applications made using the ASBA facility in initial public offerings (opening on or after September 1, 2022) shall be processed only after application monies are blocked in the bank accounts of investors (all categories).

- 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).

## **RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES**

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (earlier known as Department of Industrial Policy and Promotion) (“DPIIT”), issued the FDI Policy, which is effect from October 15, 2020, which subsumes and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the FEMA Non- Debt Instruments Rules, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India, as prescribed in the FDI Policy and the FEMA Non- Debt Instruments Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government of India.

Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Rules. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.
